

3M™ Particulate Respirator 8210V, N95 with 3M™ Cool Flow™ Valve

This disposable respirator offers the same great protection as our classic 8210, N95 particulate respirator but with the addition of the proprietary 3M™ Cool Flow™ valve. It is ideally suited for many work settings that involve heat, humidity, or longer periods of wear.

The 3M™ Particulate Respirator 8210V, N95 is NIOSH approved and helps provide reliable worker respiratory protection against certain non-oil based particles. The proprietary 3M™ Cool Flow™ valve is designed for easy exhalation and reduces heat build-up inside the respirator to help keep the wearer more comfortable. Testing shows the atmosphere inside the 8210V respirator with a 3M™ Cool Flow™ valve is on average 5.5° F cooler than a similar respirator without the valve.

3M™ Thinsulate™ Thermal Insoles

Deliver New Life to Footwear

3M™ Thinsulate™ Thermal Insoles are designed to make all outdoor work more comfortable, and are the perfect companion to most types of footwear. They help your customers to stay out longer and be more productive. The proprietary combination of 3M™ Thinsulate™ Insulation technology and energy-return performance foams set this insole apart by providing exceptional warmth and minimizing shock in every step. With the added features of antimicrobial and moisture management technology, Thinsulate thermal insoles are a class unto themselves.

- 3M™ Thinsulate™ Insulation helps provide warmth by trapping air between you and the outside.
- Moisture wicking fabrics control moisture to help keep feet drier.
- Foot-conforming foams absorb shock and provide additional comfort.
- Antimicrobial technology inhibits odor-causing bacteria in the insole.
