

BRADFORD WHITE
WATER HEATERS
Built to be the Best™

TTW1 Residential Power Vent Energy Saver Gas Water Heater

The Power Vented Water Heater Designed for installations where atmospheric units cannot be used. Exhaust gases are vented under positive pressure directly out of the building through the roof or the wall. Advanced ScreenLok® Technology Flame Arrestor is designed to prevent ignition of flammable vapor outside of the water heater. Flammable Vapor Sensor prevents burner operation if flammable vapors are detected. The tank is lined with an exclusively engineered enamel Vitraglas® formula that provides superior tank protection from the highly corrosive effects of hot water. Honeywell Self Diagnostic Electronic Gas Control with spark to pilot ignition system eliminates the constant burning pilot. Intelligent Diagnostics is an exclusive green LED light prompts the installer during start-up and provides ten different diagnostic codes to assist in troubleshooting.

M-2 Residential Upright Energy Saver Electric Water Heater

Model exceed efficiency requirements of the Department of Energy, ASHRAE Standard 90.1 b and the National Appliance Energy Conservation Act of 1987. Fast acting surface-mount thermostats for automatic temperature control. Hydrojet® 1" Non-CFC Foam Insulation results in less energy consumption, improved operation efficiencies and jacket rigidity. ¾" NPT factory installed true dielectric fittings extend water heater life and eases installation. Design incorporates a flexible disk that reduces heat loss in piping and eliminates the potential for noise generation. Durable tamper proof design. Design evaluated by UL in accordance with Part 280.707(d) of HUD Mobile Home Construction and Safety Standards for Energy Efficiency.

M-1 Residential Atmospheric Vent Energy Saver Gas Water Heater

Bradford White ICON System™ is an intelligent gas control with proven millivolt powered technology and built-in piezo igniter. Proprietary algorithms provide enhanced First Hour Delivery ratings and tighter temperature differentials. Advanced Temperature Control System Microprocessor constantly monitors and controls burner operation to maintain consistent and accurate water temperature levels. An exclusive green LED light prompts the installer during start-up and provides ten different diagnostic codes to assist in troubleshooting. Advanced ScreenLok® Technology Flame Arrestor is designed to prevent ignition of flammable vapor outside of the water heater. Hydrojet® 1" Non-CFC Foam Insulation covers the sides and top of tank, reducing the amount of heat loss and results in less energy consumption.
